

Geography Home Learning - Week 11

As you know, we were meant to have a trip to explore the River Coln in Fairford. Obviously we haven't been able to go to Osmington Bay either so we thought we could take a trip together 'virtually'! Your task is to compare Gloucester and the two trip locations.

Step 1:

Use the skills you learnt in Week 4 to explore the different areas using Google Maps. Here are the post codes for you to use, along with your own:

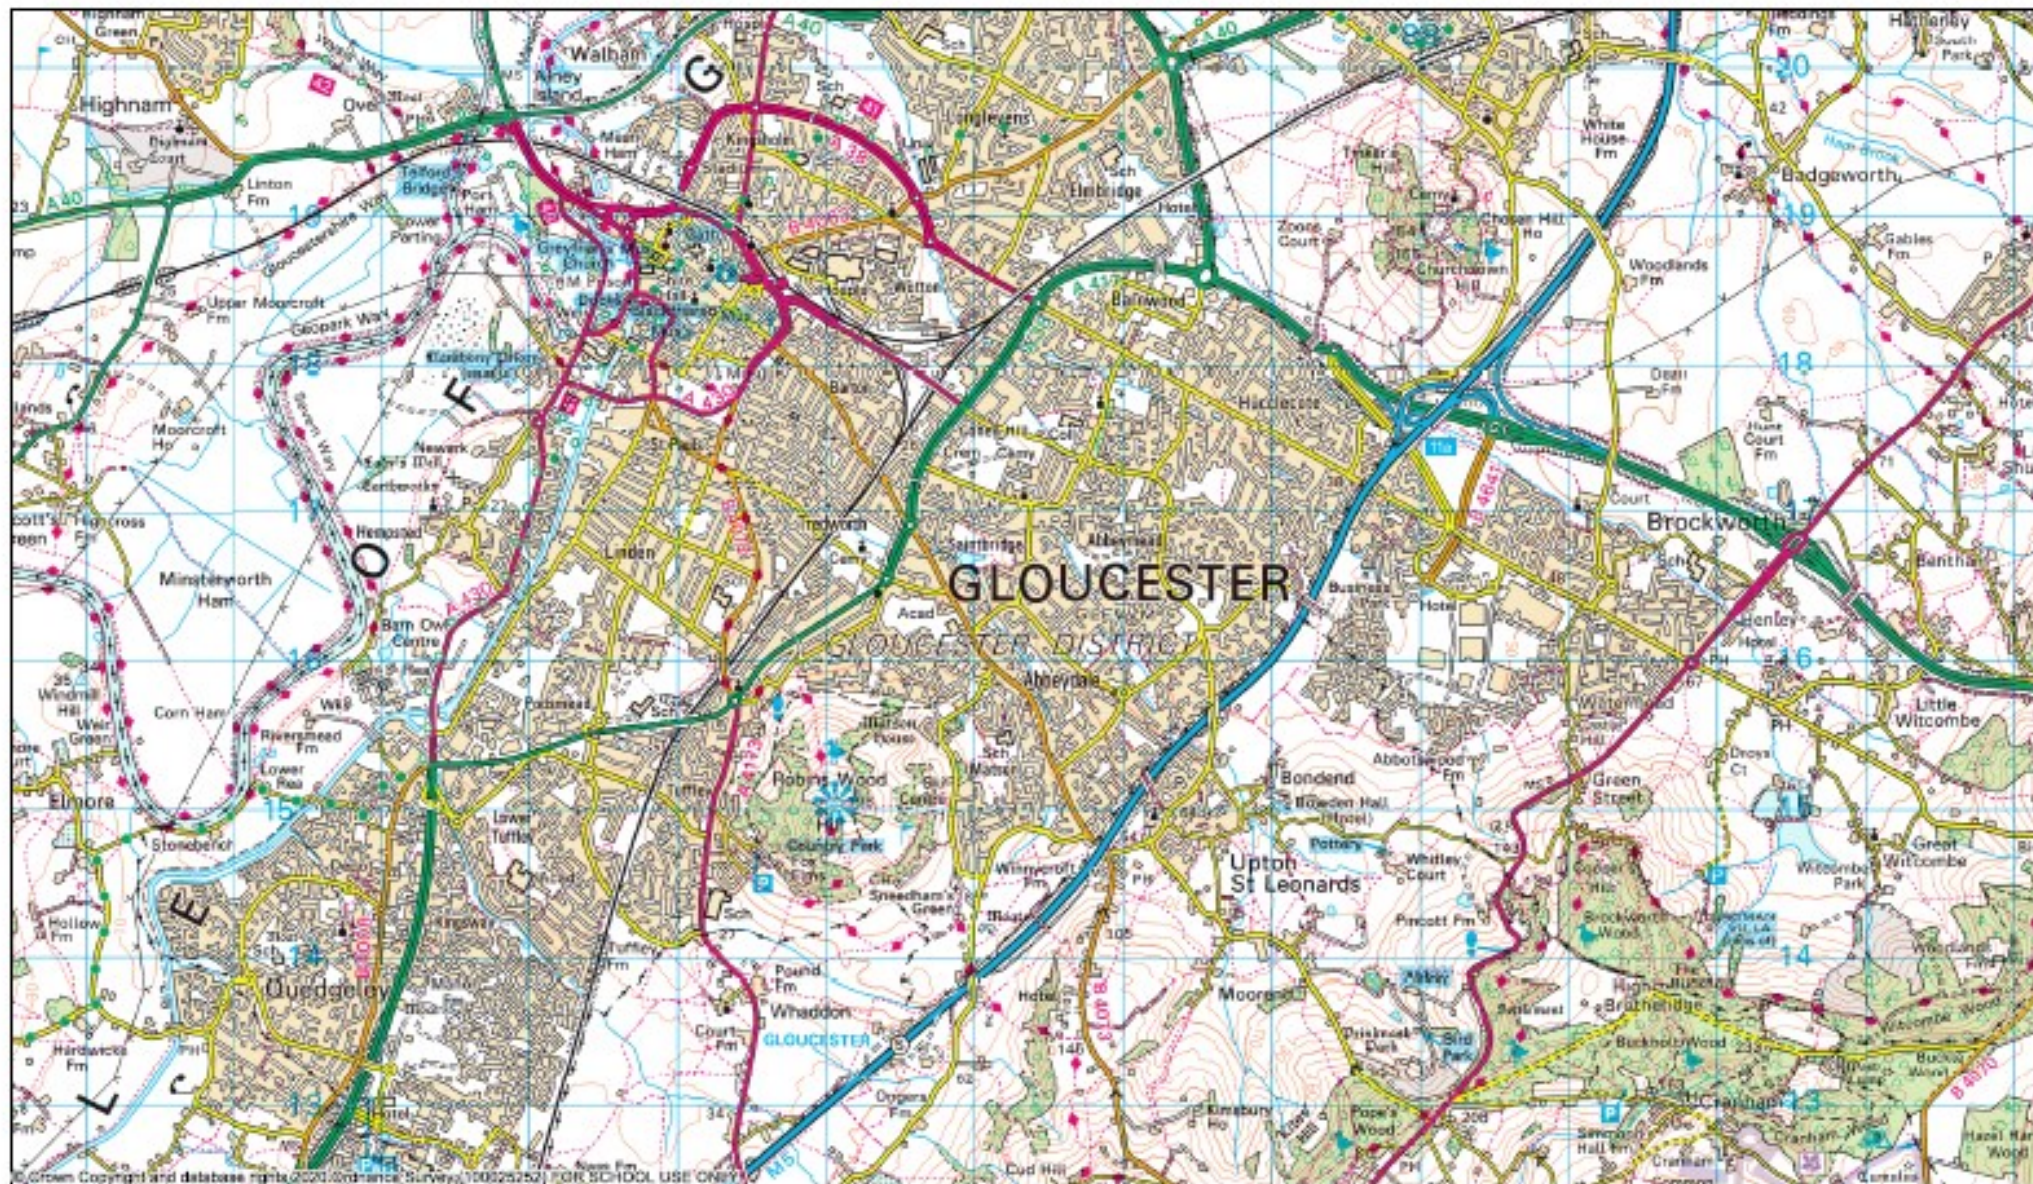

- GL7 4JH—Earnest Cook Trust, Fairford
- Osmington Bay, Weymouth

I have included a map of each one of the next few pages if you're struggling.

Step 2:

Once you have had a good look at them, then start to compare them. What do they all have in common? What are the differences between them? Is there something that one location has that the others don't? Think about the human and physical geography of the three different places.

You can record your ideas in a table with each location in a different column.
